HAIR REDUCTION

Laser hair reduction is the worlds quickest and most advanced, hair reduction system and also reduces sensitivity. The machine is the very first in the North West - 'The Lumenis Duet Laser.' This is NOT an IPL machine. IPL machines are not laser machines. Laser can reduce hair on tanned skin, coloured and even Afro Caribbean skin types. Due to the unique cooling method it reduces sensitivity during hair reduction. We have a special offer to celebrate our unique and exclusive new arrival

- NEW LIGHTSHEER DUET LASER MACHINE -1ST IN THE NORTH WEST Lightsheer DUET Website Lightsheer DUET Information

- Laser hair reduction permanently reduces the hair – on average taking just six treatments. The Lightsheer Duet is a 800nm diode laser (the ideal/best wavelength for hair removal). This system includes two hand pieces of different sizes meaning we can offer the very best hair removal to our clients and the FASTEST treatment times. Most clients will see a reduction of at least 80%. Most hair colour can be treated but not white or grey. Suitable for ALL skin types including Asian and African Caribbean. - HAND PIECE 1 has a chill tip with continuous contact cooling to help reduce pain and sensitivity. It is ideal for smaller and awkward-to-reach areas and finer hair. - HAND PIECE 2 has the largest spot size of any hair removal laser allowing for much quicker treatment times (reduced by a minimum of 50%), with an integrated vacuum system, which reduces sensitivity to the skin allowing much more comfortable treatments, ideal for larger areas on both men and women. 1ST IN THE NORTH-WEST NEW LASER HAIR REDUCTION MACHINE SPECIAL LAUNCH DAYS WITH REDUCED PRICES £25 CONSULTATION & PATCH TEST LIMITED PLACES RING 01254 721000 FOR: LAUNCH DATES & TO BOOK CONSULTATION If you would like further information on our new machine please click on the link below.
